ABOUT ME

PhD-trained social researcher with industry and academic experience designing mixed-method studies to understand behavior, decision-making, and engagement.

Experienced in managing study operations, timelines, and cross-functional collaboration, translating research into actionable insights with practical impact.

TECHNICAL SKILLS

Research Methods

Mixed-Method Studies, Longitudinal Studies, Experience Sampling, Experiments, Structured Interviews, Behavioral Observation

Data Collection & Platforms

Qualtrics, SurveyMonkey, Prolific, MTurk, ResearchMatch, Sprinklr

Data & Statistical Tools

SPSS, R, Excel; Regression, ANOVA, Correlation, Multilevel Modeling (MLM/HLM), Structural Equation Modeling (SEM), Factor Analysis, Data Visualization

Project and Study Operations

Study Protocol Development, Timeline & Deliverable Tracking, Cross-Functional Coordination, Research Documentation & Repositories

Collaboration & Impact

Cross-Functional Collaboration, Stakeholder Engagement, Client-Facing Reporting, Persona Development

Additional Training

University of Rochester LGBTQ+ Safe Space Program; Culture and Diversity Training; Quantitative Methods Certificate

EDUCATION

Ph.D., Social-Personality Psychology

University of Rochester
Sep 2019 - Oct 2025

M.A., Social-Personality Psychology

University of Rochester
Sep 2019 - Dec 2022

B.S., Social Psychology

University of California, San Diego
Sep 2015 - Jun 2019

PROFESSIONAL EXPERIENCE

Strategic Research Intern, Fully Remote — May 2024 - Dec 2025
Siemens Digital Industries Software

- Supported **consumer insights research** across SaaS enterprise products (stakeholder interviews, mixed-method surveys, Voice of the Customer (VoC) analysis, persona development, and social listening).
- Designed and analyzed **survey and VoC data** to uncover behavioral drivers**,** consumer needs, and sentiment, informing product and experience improvements.
- Collaborated **cross-functionally** with product, engineering, and data teams to integrate insights into strategic decision-making.
- Developed and maintained a **GDPR-compliant research repository**, standardizing documentation and enabling reproducible research processes.

Graduate Student Researcher — Sep 2019 - Oct 2025
University of Rochester

- Led end-to-end **behavioral and observational research projects** (e.g., study design, protocol development, budget and timeline management, recruitment, scale development, data collection, analysis, and reporting).
- Applied **mixed-method approaches** (surveys, longitudinal studies, interviews, experiments) to investigate decision-making, perception, and social/emotional dynamics, generating insights for practical applications and interventions.
- Managed 30+ research assistants, coordinating **study operations** to ensure adherence to timelines, protocols, and data quality standards.
- Synthesized qualitative and quantitative findings into actionable recommendations and clear, compelling **documentation and presentations** for academic, applied, and grant audiences.

Graduate Instructor and Teaching Assistant — Sep 2019 - Oct 2025
University of Rochester

- Designed and taught undergraduate courses in social and industrial-organizational psychology, translating complex concepts into applied learning.
- Mentored 15+ students per semester in research design, survey development, and data analysis, guiding projects from conception to presentation of findings.

SELECTED RESEARCH PROJECTS

Consumer Insights for SaaS Products

- Conducted quantitative and qualitative analysis of 7 years of **VoC data**, using thematic coding and statistical methods to identify drivers of engagement, retention, and satisfaction.
- Led **stakeholder and consumer interviews**, developing discussion guides and synthesizing insights to build actionable personas and evidence-based recommendations.
- Conducted social listening to capture **real-world consumer sentiment** and established a repeatable process for ongoing monitoring and analysis.
- Created and shared **research documentation**, including leading cross-functional sessions to promote best practices and adoption.

Emotion Expression and Regulation in Couples *(Published Article)*

- Recruited and managed 190+ couples, conducting **structured remote interviews** and **daily surveys** (5,000+ observations; 96% completion) to collect real-world behavioral data.
- Collected and coded behavioral video data (900+ videos), ensuring reliability across measures and adherence to **study protocols**.
- Applied advanced statistical models to identify patterns in behavior, emotional experience, and interpersonal dynamics, translating findings into **evidence-based recommendations**.
